India Russia relations

The cultural heritage, ethics and education have remained life blood of any civilized society. The Indo-Russian relations, both culturally and politically have remained cordial and are ever rising since ages. The ties are further strengthened by extension in the field of education in Russia viz; MBBS, MD, engineering etc. Thousands of students leave India for Russia every year to shape their future in the field of medical and engineering. The emerging Doctors and Engineers are not only rendering their services in the specific expertise all around the world but also foster as an instrument of cultural and social interaction between India and Russia.

"Relations with India have always been and I am sure will be one of the most important foreign policy priorities of our country. Our mutual ties of friendship are filled with sympathy, and trust, and openness.

And we must say frankly that they were never overshadowed by disagreements or conflict. This understanding - this is indeed the common heritage of our peoples. It is valued and cherished in our country, in Russia, and in India. And we are rightfully proud of so close, so close relations between our countries".

Dmitry Medvedev, President of Russia, (2008 to 2012)

"We are confident that India lives in the hearts of every Russian. In the same way, I can assure you that Russia also lives in our souls as a Homeland, as people who share our emotions, our feelings of mutual respect and constant friendship. Long live our friendship!"

Pratibha Patil, President of India (2007 to 2012)

India Russia relations

Visit of Honourable Prime Minister of India, Shri Narendra Modi to India

Rus Education arranged meeting of Indian Students enrolled in Russian Universities with Honourable Prime Minister of India, Shri Narendra Modi during his visit to Moscow, Russia.

Education System in Russia

The Russian educational system, as it has been noted many times by major international experts, is one of the most developed and advanced educational systems in the world. In the context of a changing society the educational system proved to be capable, on the one hand, of adapting to rapid transformations of new realities (while preserving its well-known strong qualities) and on the other hand, to the phase of prolonged evolutionary reformation.

Higher education is under the jurisdiction of the Ministry for Education and Science of the Russian Federation, which is responsible for the accreditation and licensing of higher education establishments, and for developing and maintaining State Educational Standards. Only accredited higher education establishments have the right to issue state diplomas and degrees ensuring full vocational and academic rights, and are covered by the international agreements on mutual recognition and validation of education documents. Only accredited higher education establishments have the right to use the seal with the national emblem of the Russian Federation. All state degrees awarding specific qualifications to a graduate, irrespective of the type of educational institution (University, Academy, and Institute) and the ownership pattern (state, municipal, non-state), are equal in status.

Russia, with the highest literacy rate in the world (99.6%), has become increasingly popular as a destination of higher studies amongst international students due to its global standards of education (with European equivalence) and affordable costs.

The last 15-20 years have seen a surge in the number of international students coming to the Russian Federation. Thousands of Indian students graduate from the more popular Russian universities every year.

Russia has proven prowess in fields like aviation, engineering, aerospace and medicine. The language barrier diminished Russia's attractiveness as a destination for higher education in the past, but now many Russian universities are offering courses in English, especially in fields like medicine.

The Russian Universities, traditionally occupy leading position in the world. Many of the medical Universities find a place in the World Health Organization (WHO)'s "Directory of World Medical Schools". This listing make a student graduating from such University eligible to appear for many of the screening tests like the USMLE, PLAB and also the newly introduced "Screening examination" conducted by the National Board Of

Examinations, India, under the directive of the Medical Council of India.

The Russian Federation discerns the following types of higher education establishments:

University is a higher education institution with activities aimed at developing education, science, and culture by performing fundamental scientific research and training at all the levels of higher, post-higher and further education within a wide range of Natural Sciences, Humanities and other directions of science, technology, and culture.

Academy is a higher education institution aimed at developing education, science, and culture by performing fundamental scientific research and training at all the levels of higher, post-higher and further education, mainly in one specific area of science, technology and culture.

Institute is an independent higher education institution or a part (structural unit) of the university, and academy that applies vocational educational curricula in specific areas of science, technology, culture and is involved in scientific research.
