Study at Ilia State University

About Ilia State University

Founded in 2006 through the merger of six distinguished academic institutions, Ilia State University (ISU) is a leading public research university located in Tbilisi, Georgia. It is widely recognized as the No.1 research university in the South Caucasus region (SCImago Institutions Rankings). Known for its excellence in teaching and research, ISU provides world-class education across various disciplines, with a strong emphasis on innovation, societal development, and international collaboration.

The university has over 300 professors, 1,000+ lecturers, and operates 30+ research institutes and centers. With a student population of nearly 16,000, ISU offers a diverse and inclusive academic environment.

Why Choose Ilia State University for MBBS?

Government university with strong academic reputation

Recognized by NMC (India), WHO, FAIMER, and ECFMG

Modern research and clinical training infrastructure

English-medium Medical Doctor (MD) program

1,000+ hours of clinical skills training

Exposure to research via ISU Medical Scientific Research Institute

Multicultural environment and student-friendly campus life

Located in the heart of Tbilisi, Georgia

MD Program at Ilia State University

Program Highlights:

Degree Offered: Medical Doctor (MD)

Program Duration: 6 Years (including internship)

Medium of Instruction: English

Clinical Training: Hands-on learning in top Georgian hospitals

Research: Access to advanced scientific laboratories and ongoing research projects

The program prepares competent medical doctors with the knowledge and practical skills to meet both national and global healthcare demands. Graduates are qualified for medical licensing exams worldwide and can pursue postgraduate studies or clinical practice internationally.
